WHO AM I?

I've been working in the DevOps area since 2018. My focus lies in designing and implementing CI/CD processes, configuration management, Infrastructure-as-Code, and technical project management. I feel most comfortable in Rust, Java, or Python environments - preferably in Docker containers. Loving what I do, I follow the principles of Software Craftmanship.

EXPERIENCE

from 2024

Freelancer

self-employed

Having gained valuable experience in my previous positions, I decided it's time for me to become self-employed in early 2024. I understand crucial IT challenges that most companies face, and I'm ready to apply my knowledge to help your teams reach their DevOps goals.

2023
until December

DevOps Engineer

Next Kraftwerke GmbH

I was part of a small DevOps team whose job it was to keep the developer tools infrastructure up and running. My main concern was setting up Jenkins pipelines, maintaining containerized services, and carrying out troubleshooting with dev teams.

Kubernetes / Nexus3 / Jenkins / GitLab

2019 - 2023

Senior DevOps Engineer

diva-e NEXT GmbH

Being one of two designated DevOps Engineers in the department, I was working with many international clients to maintain and deploy their commercial websites using Adobe Experience Manager. I also worked on open source DevOps software (wcm.io project).

AEM / Ansible / Jenkins / AWS / Terraform

2018 - 2019

Junior Software Engineer

daqana Data Science Solutions GmbH

My main occupation was configuring and deploying customer software as Docker containers. I've also learned some advanced Postgres programming using stored procedures and DB migration tools.

R / Docker / PostgreSQL

EDUCATION

2015 - 2018

Master of Science

Geoinformation and Visualization

University of Potsdam

2012 - 2015

Bachelor of Science

Geocology

University of Potsdam

LANGUAGES

German - native

English - fluent

French - rudimentary

HOBBIES

I love playing the drums, working in the garden, riding my gravel bike, and going to metal shows.

PROJECTS

I'm hosting some of my projects on GitHub, feel free to check out my profile (see top of the page).
